SUMMARY

IT leader and hands-on software developer with 10+ years of experience across automotive technology, web application engineering, eCommerce, SaaS products, infrastructure, and IT operations. Combines IT management and system administration with practical full-stack engineering and product delivery. Experienced in automotive digital platforms, CRM and messaging integrations, hosting/server management, application performance, and cross-functional delivery. At Asian Holdings, led and delivered IT and digital-platform work for Chery Bangladesh, OMODA & JAECOO Bangladesh, and related automotive and commerce properties.

EXPERIENCE

IT Manager / Full-Stack Developer | Asian Holdings | January 2024 - Present

- Lead IT operations and digital platform development across automotive, eCommerce, and customer-facing business systems.
- Develop and maintain Chery Bangladesh and OMODA & JAECOO Bangladesh websites, managing full-stack development, CMS workflows, integrations, and performance optimization.
- Oversee development and maintenance across Asian Imports, AutoTrader BD, Japan Parts, SK Japan Export, Moto JP, and ELF Bangladesh digital platforms.
- Drive Asian Imports CRM development and AutoTrader BD enhancements, including CRM synchronization and business workflow integration.
- Maintain and enhance the ELF Bangladesh mobile application, including automated disbursement workflows and application performance optimization.
- Manage hosting, server support, security patching, troubleshooting, deployments, and quality assurance while coordinating technical solutions and deliverables with business stakeholders.

Manager, IT | Continental Motors | October 2018 - April 2023

- Managed the IT department and helped ensure business systems operated smoothly.
- Coordinated IT operations, technology suppliers, staff support, and software-development delivery.
- Administered server and hosting environments, including Windows Server, VPS, WHM, and cPanel.
- Introduced a real-time smart attendance system with automated payroll and established an integrated call-center setup.
- Previous resume reports a 40% IT/server cost reduction through vendor selection, negotiation, and hands-on server management.

Full Stack Web Developer | Kawasaki Bangladesh (Asian Motorbikes Limited) | September 2018 - April 2023

- Developed and maintained web applications and APIs for automotive business operations.
- Built an automotive eCommerce platform integrating CRM, Facebook Pixel, and WhatsApp Business API.
- Improved shipping-charge functionality and developed car-price calculation tools for automotive commerce.
- Contributed to the Chery Bangladesh website with 360-degree vehicle views; previous resume reports speed optimization of up to 97%.
- Conducted code reviews, resolved bugs, optimized performance, and supported deployments using Docker, DigitalOcean, and Google Cloud.

Senior Software Developer (Web) | Bengal Group of Industries | January 2018 - September 2018

- Led a 15-member team; previous resume reports a 25% increase in client satisfaction.
- Led Laravel-based eCommerce development for Pick4Less and managed custom WordPress theme and plugin projects.
- Developed a domain and hosting sales platform with WHMCS integration and coordinated projects using Agile practices.

PROJECT

Chery Bangladesh — Automotive Brand Website | www.cherybd.com/

- An automotive website built to showcase Chery vehicles and help prospective customers explore models, specifications, and brand information. The platform includes rich vehicle presentations, including 360-degree vehicle views, and customer-facing features that support enquiries and the vehicle-buying journey.
- Key features: Vehicle catalog, model specifications, 360-degree vehicle views, brochure downloads, test-drive enquiries, service information, and customer lead integration.
- Enhanced lead generation by integrating a comprehensive test-drive enquiry system with the CRM backend.

OMODA & JAECOO Bangladesh — Automotive Brand Websites | www.omodajaecoobd.com/

- Digital platforms for the OMODA and JAECOO automotive brands, presenting vehicle models, product information, and customer services through a modern online experience.
- Key features: Vehicle showcase, model details, downloadable brochures, test-drive requests, dealer information, customer enquiries, and website content management.
- Developed interactive vehicle configurators and 360-degree view integrations to enhance model exploration for OMODA and JAECOO brands.
- Streamlined user journeys by implementing interactive vehicle configurators and 360-degree view integrations for enhanced model exploration.

Asian Imports CRM & Auto Trader | motoos360-7kx54.ondigitalocean.app

- A custom CRM initiative designed to centralize business information and improve workflows across automotive operations. The system focuses on managing customer and business records, user access, operational data, and reporting.

- Key features: Customer records, user and role management, administrative dashboards, inventory and sales workflows, reports, and integration with automotive business platforms.
- Engineered a comprehensive reporting module within the CRM to provide actionable insights into sales pipelines and customer engagement metrics.

ELF Bangladesh — Corporate Website & Mobile Application | play.google.com/store/apps/details?id=com.asianpetroleum.elf

- Developed and maintained the ELF Bangladesh mobile application and digital platforms, enhancing customer-facing features and operational workflows. Implemented an automated disbursement workflow to streamline operations and reduce manual intervention. Optimized application performance through caching strategies and API call improvements, achieving a **20% reduction in load times** across key customer-facing modules.
- Designed and implemented a secure user authentication and authorization system, ensuring data privacy and role-based access control for diverse user segments.

Japan Parts — Automotive Parts eCommerce | Asian Holdings | japanparts.com.bd

- An automotive eCommerce platform offering Japanese vehicle spare parts, lubricants, tyres, accessories, and car-care products. The online store helps customers browse products by category and brand, check availability, place orders, and access product support and delivery or store-pickup options in Bangladesh.
- Integrated Shopify headless commerce with a React frontend to enhance product browsing and streamline the checkout process for automotive parts customers.

TurfLet - Turf Booking Marketplace | turflet.app

- A sports booking platform connecting players with sports venues while giving turf owners tools to manage bookings and daily operations. Players can discover venues, check live availability, reserve time slots, and pay online. Owners can manage bookings, payments, staff, and venue operations.
- Key features: Real-time availability, online booking, bKash/Nagad/card payments, owner dashboard, team management, waitlists, loyalty rewards, booking notifications, and venue management.
- Architected and implemented a multi-tenant SaaS architecture, enabling scalable onboarding of new turf venues and diverse pricing models.

NextPilot Chat — WhatsApp CRM & AI Automation | nextpilot.chat

- A WhatsApp-first CRM that brings customer conversations, sales pipeline management, AI-powered replies, and messaging automation into one workspace. It helps teams handle enquiries, manage leads, coordinate customer support, and automate follow-ups.
- Key features: Shared team inbox, WhatsApp Business API integration, lead management, pipeline tracking, AI-assisted replies, workflow automation, broadcasts, customer segmentation, and analytics.
- Integrated AI-powered chatbot for instant customer support and lead qualification, reducing response times and improving user engagement.
- Developed a shared team inbox and AI-assisted reply system to improve customer response times and streamline lead management.

AutoTrader BD — B2B Automotive Marketplace | autotraderbd.com

- A B2B automotive trading platform designed for car importers, dealers, and automotive traders in Bangladesh. The platform supports vehicle inventory management, vehicle listings, buyer discovery, dealer accounts, and tools that help businesses manage vehicle trading activities.
- Key features: Dealer accounts, vehicle inventory and listings, vehicle search, seller tools, buyer tools, and automotive trading workflows.
- Implemented advanced search and filtering to optimize inventory discovery and user experience for automotive parts buyers and sellers.

SK Japan Export — Japanese Vehicle Export Platform | skjapanexport.co.jp

- A Japanese automotive trading and export platform specializing in sourcing and exporting vehicles to international markets. The website enables buyers to explore available stock, search vehicles through Japanese auto auctions, review vehicle specifications and pricing, and inquire about purchasing options. The company also describes vehicle maintenance services and support for sourcing vehicles to customer requirements and implemented a user-friendly interface for vehicle browsing and auction searching.
- Integrated Japanese auto auction search functionality, enabling real-time vehicle stock discovery and competitive pricing analysis for international buyers.
