

Professional Component Design Guidelines

Typography System

Font Hierarchy (Mobile-First Responsive)

```
CSS

/* Main Section Titles */
text-3xl sm:text-4xl md:text-5xl font-bold text-gray-900
/* OR for gradient text */
text-3xl sm:text-4xl md:text-5xl font-bold bg-gradient-to-r from-gray-800 via-blue-800

/* Section Headings */
text-2xl md:text-3xl font-bold text-gray-900

/* Subsection Titles */
text-xl md:text-2xl font-bold text-gray-900

/* Card/Component Titles */
text-lg md:text-xl font-bold text-gray-900

/* Body Text - Primary */
text-base md:text-lg text-gray-700 leading-relaxed

/* Body Text - Secondary */
text-sm md:text-base text-gray-600 leading-relaxed

/* Labels & Small Text */
text-sm md:text-base font-semibold text-gray-700

/* Captions & Meta Info */
text-xs md:text-sm font-medium text-gray-500

/* Buttons */
text-base md:text-lg font-bold (for primary buttons)
text-sm md:text-base font-semibold (for secondary buttons)
```

Font Weight Standards

- **font-bold:** Main headings, important titles, primary buttons
- **font-semibold:** Form labels, card titles, secondary buttons
- **font-medium:** Meta information, captions, small labels
- **font-normal:** Body text (default, rarely specified)

Color System

CSS

```
/* Text Colors */
text-gray-900    /* Primary headings and important content */
text-gray-800    /* Secondary headings */
text-gray-700    /* Primary body text */
text-gray-600    /* Secondary body text and descriptions */
text-gray-500    /* Meta information and muted content */
text-gray-400    /* Placeholder text and disabled states */

/* For Dark Themes */
text-white       /* Primary headings */
text-gray-100    /* Secondary headings */
text-gray-200    /* Body text */
text-gray-300    /* Secondary text */
text-gray-400    /* Muted text */

/* Accent Colors */
text-blue-600    /* Primary actions and links */
text-green-600   /* Success states */
text-red-600     /* Error states */
text-yellow-600  /* Warning states */
```

Component Structure Pattern

Standard Section Layout

jsx

```
<section className="py-16 md:py-20 px-4 sm:px-6 lg:px-8 bg-gradient-to-b from-gray-50 to-gray-100">
  <div className="max-w-6xl mx-auto">

    {/* Header Section */}
    <motion.div className="text-center mb-12">
      {/* Badge */}
      <div className="inline-flex items-center gap-2 bg-blue-50 text-blue-700 px-4 py-2">
        <Icon className="w-4 h-4" />
        Section Label
      </div>

      {/* Main Title */}
      <h2 className="text-3xl md:text-4xl font-bold text-gray-900 mb-4">
        Section Title
      </h2>

      {/* Description */}
      <p className="text-lg text-gray-600 max-w-3xl mx-auto leading-relaxed">
        Section description text here.
      </p>
    </motion.div>

    {/* Content Section */}
    <div className="mb-12">
      {/* Component content */}
    </div>

    {/* Optional CTA Section */}
    <div className="text-center">
      {/* Call to action */}
    </div>
  </div>
</section>
```

Card Design Standards

Primary Card Style

jsx

```
<div className="bg-white border border-gray-200 rounded-xl p-6 shadow-sm hover:shadow-l
  {/* Card content */}
</div>
```

Enhanced Card Style

jsx

```
<div className="bg-white border-2 border-gray-200 rounded-xl p-6 shadow-sm hover:shadow
  {/* Card content */}
</div>
```

Dark Theme Card

jsx

```
<div className="bg-white/[0.02] backdrop-blur-md border border-slate-800/50 rounded-xl
  {/* Card content */}
</div>
```

🎯 Interactive States

Button Styles

jsx

```
{/* Primary Button */}
<button className="inline-flex items-center justify-center gap-2 bg-blue-600 text-white
  <Icon className="w-5 h-5" />
  Button Text
</button>

{/* Secondary Button */}
<button className="inline-flex items-center justify-center gap-2 bg-white border-2 bor
  <Icon className="w-5 h-5" />
  Button Text
</button>
```

Form Elements

```

jsx

{/* Form Label */}
<label className="block text-sm md:text-base font-semibold mb-2 text-gray-700">
  Label Text
</label>

{/* Input Field */}
<input className="w-full px-4 py-3 border border-gray-300 rounded-lg text-base text-gray-900" type="text" />

{/* Select Field */}
<select className="w-full px-4 py-3 border border-gray-300 rounded-lg text-base text-gray-900">
  {/* Options */}
</select>

```

Animation Patterns

Standard Animation Variants

```

jsx

const fadeInUp = {
  initial: { opacity: 0, y: 20 },
  animate: { opacity: 1, y: 0 },
  transition: { duration: 0.4, ease: "easeOut" }
};

const staggerContainer = {
  animate: {
    transition: {
      staggerChildren: 0.1,
      delayChildren: 0.1
    }
  }
};

```

Hover Effects

jsx

```
{/* Card Hover */}  
whileHover={{ y: -2, scale: 1.02 }}  
  
{/* Button Hover */}  
whileHover={{ scale: 1.05 }}  
whileTap={{ scale: 0.95 }}  
  
{/* Icon Hover */}  
group-hover:scale-110 transition-transform duration-300
```

Spacing Standards

Section Spacing

- **Section Padding:** `py-16 md:py-20`
- **Container Padding:** `px-4 sm:px-6 lg:px-8`
- **Element Margins:** `mb-8 md:mb-12` (between major sections)
- **Small Gaps:** `gap-4 md:gap-6` (between cards/items)
- **Large Gaps:** `gap-6 md:gap-8` (between major components)

Container Widths

- **Small Components:** `max-w-4xl mx-auto`
- **Standard Components:** `max-w-6xl mx-auto`
- **Wide Components:** `max-w-7xl mx-auto`

Color Palette

Background Colors

CSS

```
/* Light Theme */  
bg-gradient-to-b from-gray-50 to-white  
bg-white  
bg-gray-50  
bg-blue-50 (for accent sections)  
  
/* Dark Theme */  
bg-gradient-to-br from-slate-900 via-gray-900 to-slate-900  
bg-slate-900  
bg-white/[0.02] (for cards)
```

Border Colors

CSS

```
border-gray-200      /* Light theme standard */
border-gray-300      /* Light theme emphasized */
border-slate-800/50 /* Dark theme standard */
border-blue-500/30   /* Accent borders */
```

Responsive Design Rules

Breakpoint Usage

- **Mobile First:** Always start with mobile styles
- **sm:** `640px` - Small tablets and large phones
- **md:** `768px` - Tablets and small laptops
- **lg:** `1024px` - Laptops and small desktops
- **xl:** `1280px` - Large desktops

Grid Patterns

JSX

```
{/* Common Grid Patterns */}
grid grid-cols-1 md:grid-cols-2 lg:grid-cols-3
grid grid-cols-1 sm:grid-cols-2 lg:grid-cols-4
grid grid-cols-2 md:grid-cols-4
```

```
{/* Flexible Layouts */}
flex flex-col sm:flex-row
flex flex-col md:flex-row
```

Usage Examples

Creating a New Component

1. Start with the standard section layout
2. Apply typography hierarchy consistently
3. Use standard card designs for content blocks
4. Implement hover effects and animations
5. Ensure responsive design across all breakpoints
6. Test with both light and dark themes

Typography Checklist

- ☐ Main title uses proper size hierarchy
- ☐ Body text is readable (base/lg sizes)
- ☐ Labels are semibold and appropriately sized
- ☐ Color contrast meets accessibility standards
- ☐ Responsive scaling is implemented
- ☐ Font weights are consistent

Component Checklist

- ☐ Proper section padding and margins
- ☐ Cards have consistent styling
- ☐ Interactive states are implemented
- ☐ Animations follow standard patterns
- ☐ Mobile-first responsive design
- ☐ Accessible color combinations

Key Principles

1. **Consistency:** Use the same patterns across all components
2. **Accessibility:** Ensure proper contrast and readable font sizes
3. **Responsiveness:** Mobile-first approach with proper scaling
4. **Performance:** Smooth animations and efficient CSS
5. **Maintainability:** Clear naming conventions and reusable patterns

This guideline ensures all components maintain professional typography and consistent design patterns while remaining flexible for different content types.
