

Get Quote Component - Complete Setup Guide

Quick Start

1. Install Dependencies

```
bash
```

```
npm install nodemailer framer-motion
```

```
# If using TypeScript:
```

```
npm install @types/nodemailer --save-dev
```

2. Environment Setup

Create `.env.local` in your project root:

```
env
```

```
EMAIL_USER=your-gmail@gmail.com
```

```
EMAIL_APP_PASSWORD=your-16-char-app-password
```

```
NEXT_PUBLIC_APP_URL=http://localhost:3000
```

3. Gmail Configuration

1. **Enable 2-Factor Authentication** on your Gmail account

2. Go to [Google Account Security](#).

3. Navigate to **2-Step Verification** → **App passwords**

4. Create new app password:

- App: **Mail**
- Device: **Other (Custom name)** → "Next.js Portfolio"

5. Copy the 16-character password to `EMAIL_APP_PASSWORD`

4. File Structure

```
your-project/
├── app/
│   ├── api/
│   │   └── quote/
│   │       └── route.js
│   ├── components/
│   │   └── GetQuote.jsx
│   ├── .env.local
│   └── package.json
```

Email Templates Features

Admin Email (to shorifull@gmail.com)

- **Professional HTML Design** with gradient headers
- **Complete Client Information** - name, email, company, phone
- **Detailed Project Requirements** - type, budget, timeline, features
- **Priority Indicators** - visual badges with animations for urgent requests
- **Lead Scoring System** - automatically categorizes leads
- **Action Items** - clear next steps and response times
- **Mobile Responsive** design

Client Confirmation Email

- **Branded Welcome Message** with professional styling
- **Project Summary** with reference ID for tracking
- **Clear Next Steps** - what to expect and when
- **Free Consultation Offer** - 30-minute strategy call
- **Portfolio Links** - while you wait section
- **Contact Information** - direct ways to reach you
- **Social Media Links** - LinkedIn, GitHub, Portfolio
- **Professional Footer** with credentials

Design Features

Component Design (No Border Radius)

- **Sharp, Modern Aesthetic** - clean rectangular forms
- **Professional Color Scheme** - blue to purple gradients
- **Interactive Elements** - hover effects and animations

- **Responsive Grid Layouts** - works on all devices
- **Accessibility Compliant** - WCAG guidelines followed
- **Loading States** - professional submission feedback

Form Capabilities

- **Multi-Step Information Gathering:**
 - Personal/Business Information
 - Project Type Selection (8 categories)
 - Budget Range (6 options)
 - Timeline Requirements (6 options)
 - Feature Selection (12+ options)
 - Priority Level Setting
 - Detailed Project Description

Advanced Features

- **Real-time Validation** - instant feedback
- **Error Handling** - user-friendly messages
- **Success/Failure States** - clear status indicators
- **Spam Protection** - basic validation rules
- **Mobile Optimized** - touch-friendly interfaces

Customization Options

Email Templates

```
javascript

// Modify email templates in route.js
const getAdminEmailTemplate = (formData) => {
  // Customize admin email design and content
};

const getClientEmailTemplate = (formData) => {
  // Customize client confirmation email
};
```

Form Fields

javascript

```
// Add/modify project types
const projectTypes = [
  { id: 'custom-service', name: 'Your Custom Service', icon: '🎯' },
  // ... existing types
];

// Modify budget ranges
const budgetRanges = [
  { id: 'custom-range', label: 'Custom Range', value: 'custom' },
  // ... existing ranges
];
```

Styling

css

```
/* Modify colors in component */
.bg-gradient-to-r from-blue-600 to-purple-600 /* Primary gradient */
.border-blue-500 /* Focus states */
.bg-slate-50 /* Background colors */
```

Analytics & Tracking

Built-in Features

- **Reference ID Generation** - unique tracking for each quote
- **Timestamp Logging** - submission time tracking
- **Lead Scoring** - automatic priority assignment
- **Response Time Calculation** - based on priority level

Metrics You Can Track

- Quote request volume
- Project type popularity
- Budget distribution
- Response time adherence
- Conversion rates

Production Deployment

Environment Variables

Set these in your hosting platform:

env

EMAIL_USER=your-production-email@gmail.com

EMAIL_APP_PASSWORD=your-app-password

NEXT_PUBLIC_APP_URL=https://yourdomain.com

Recommended Services

- **Hosting:** Vercel, Netlify, Digital Ocean
- **Email Service:** Consider upgrading to SendGrid or Mailgun for high volume
- **Domain:** Custom domain for professional emails
- **SSL:** Ensure HTTPS for form security

Security Considerations

Email Security

- Uses Gmail's secure SMTP with app passwords
- No sensitive data stored in code
- Environment variables for credentials
- Email validation and sanitization

Form Security

- Input validation and sanitization
- Rate limiting (implement if needed)
- CSRF protection (Next.js built-in)
- XSS prevention through proper escaping

Mobile Optimization

Responsive Design

- **Touch-Friendly Elements** - 44px minimum touch targets
- **Mobile-First Approach** - designed for small screens first
- **Swipe-Friendly Forms** - easy navigation on mobile
- **Keyboard Optimization** - proper input types and patterns

Conversion Optimization

UX Best Practices

- **Progressive Disclosure** - information revealed step-by-step

- **Visual Feedback** - immediate response to user actions
- **Clear Value Proposition** - benefits clearly stated
- **Social Proof** - testimonials and stats included
- **Multiple Contact Methods** - email, phone, consultation

A/B Testing Opportunities

- Form length (single page vs. multi-step)
- Button colors and text
- Headline variations
- Feature list presentation
- Call-to-action placement

Troubleshooting

Common Issues

1. **Emails not sending:** Check Gmail app password and 2FA
2. **Form not submitting:** Verify API route is accessible
3. **Styling issues:** Ensure Tailwind CSS is properly configured
4. **Mobile display:** Test responsive breakpoints

Debug Tips

javascript

// Add logging in API route

```
console.log('Form data received:', formData);  
console.log('Email sent successfully');
```

// Check environment variables

```
console.log('Gmail user:', process.env.GMAIL_USER);
```

Performance Optimization

Best Practices

- **Image Optimization** - use Next.js Image component
- **Code Splitting** - lazy load form components
- **Email Templates** - optimize HTML for email clients
- **Database Logging** - consider storing quotes for analytics

Customization Examples

Brand Colors

javascript

```
// Replace blue/purple with your brand colors
'from-blue-600 to-purple-600'    // Primary buttons
'border-blue-500'                // Focus states
'text-blue-800'                  // Accent text
'bg-blue-50'                     // Light backgrounds
```

Additional Project Types

javascript

```
const projectTypes = [
  // ... existing types
  { id: 'consulting', name: 'Technical Consulting', icon: '🔍' },
  { id: 'maintenance', name: 'Website Maintenance', icon: '🔧' },
  { id: 'seo', name: 'SEO Optimization', icon: '✅' },
];
```

This comprehensive quote system will help you capture leads professionally while providing an excellent user experience for potential clients!
